

2017 OEP SEMINAR

14 FEBRUARY 2017

09:00 - 13:45

PIRAEUS, GREECE

You are cordially invited to attend an ABS seminar on Operational and Environmental Performance.

ABS has developed solutions and services related to vessel performance. Presentations will cover subjects such as the purpose of having a Vessel Performance Management System, data logging opportunities, data visualization and interpretation, performance analysis and benchmarking. There will also be a demonstration of the ABS Vessel Performance software.

In addition, ABS capabilities on the development of energy efficient designs and evaluation of different solutions from a techno-economical perspective will be discussed.

This seminar will conclude with an MRV update, "How to Comply", presented together with the latest IMO and US environmental regulations and implementation challenges.

This is an invitation-only event and attendance is free. Complimentary refreshments will be offered during the breaks. To reserve your place, you can register electronically by [clicking here](#) or email or call-in your reservation by **Friday, 10 February 2017**, to:
